Kansas City, Kansas 66115

Re: Hazardous Waste Compliance Inspection
EPA Identification Number KSD000203638

Dear Mr. Dame:

On December 17, 1990, your facility was inspected to determine compliance with state hazardous waste regulations.

The inspection revealed that Olin Water Services generates hazardous waste from the preparation of liquid and powder water treatment formulations. These wastes are identified by the following waste codes:

- D001 Solid waste which exhibits the characteristics of Ignitability
- D002 Solid waste which exhibits the characteristics of Corrosivity
- D003 Solid waste which exhibits the characteristics of Reactivity
- D007 Solid waste which exhibits the characteristics of EP Toxicity for chromium
- F001 Methylene Chloride which exhibits the characteristics of being toxic
- Various U-Listed chemicals

In addition to being a generator Olin Water Services has a hazardous waste storage permit. The facility is, therefore, subject to the requirements of 40 CFR, Parts 260 to 264, 270 and 124 and the specific conditions of Permit Number KSD000203638.

The inspection identified the following items not in compliance with state and federal regulations concerning generators of hazardous waste:

1. During the inspection I noted the emergency contact person and warehouse evacuation route had changed. These changes require a Class I, II or III permit modification. The class of permit modifications are listed in Appendix I in 40 CFR, Part 270.42. Please contact Steve Broslavick at (913) 296-1609 in the Topeka office regarding the class type to be used by your facility.

Mr. William E. Dame
